

## KLEEN KOTE 111 - EQUIPMENT PROTECTION

The ultimate protection, KLEEN KOTE 111 is a long-lasting, biodegradable release agent formulated with corrosion-inhibitors to withstand the demands of the job. KK111 creates a thin, colorless barrier on the surface of equipment, machinery and tools. It is designed for use all on types of surfaces to repel: slurry, concrete, concrete splatter, mud, debris, paint build up, paint splatter and more. Protect your equipment and extend its useful life during use, storage, transit, export and seasonal lay-ups.

### BENEFITS

- Safe for use on all types of surfaces: rubber, metal, plastic, electrical/wiring, glass, wood, motors
- Safe for employees: no special equipment or clothing required for application
- Out lasts rain and snow--works until the job is complete
- Environmentally safe, biodegradable: does not contain any solvents, silicones or phosphates
  - Non-toxic, water-based, low odor
  - Low V.O.C.--15 g/L
- Prevents corrosion caused by salt, fertilizer, the environment and climate changes
- Protects equipment during: use, storage, transit, export, preservation and seasonal lay-up

### AVAILABLE SIZES:

- 5 gallon pail
- 55 gallon drum
- 275 gallon tote\*

*\*totes are reusable*

### EFFECTIVE ON:

- Ready-mix trucks
- Concrete pumping and belt trucks
- Concrete equipment
- Construction equipment
- Hand tools
- Painting equipment
- Rental equipment/tools
- Sawing & planing equipment
- Liquid mask to prevent concrete from sticking to surfaces adjacent to the pour
