

KLEEN KOTE 115 - CONCRETE FORM RELEASE

KLEEN KOTE 115 has been the premier form release for over 17 years. Formulated specifically for non-porous forms, KK115 deposits a very thin film, creating a virtually non-stick surface and is non-dusting, non-staining to provide an excellent finished surface ready to be stained or painted if required. This ready-to-use, eco-friendly release agent does not require any measuring/mixing, special equipment, clothing or tools. It is water-based, V.O.C. compliant and does not contain any silicones, solvents or phosphates. KK115 will not rinse off in rain or inclement weather*, making it one of the most durable, safe and cost effective form releases to use!

**KK115 must flash off BEFORE exposed to rain or inclement weather to be effective.*

BENEFITS

- Recommend by major formliner manufacturers
- Easy to use--no measuring or mixing, ready to use!
- Safe for employees--no special equipment or clothing required
