Gomaco Corporation

Location: Ida Grove, Iowa USA

Industry: Anti-Corrosion

Product: KLEEN KOTE

Background:

Gomaco Corporation is the worldwide leader in concrete paving technology, manufacturing curb and gutter machines, slipform pavers, placer/spreaders, trimmer/placers, cylinder finishers, canal machinery and accessories. Gomaco Corporation has distribution throughout the world and ships their machinery via ocean freight with exposure to various environmental conditions. Gomaco has promoted the use of KLEEN KOTE to protect their machinery while in the construction field, and determined that the corrosion prevention properties would be beneficial to their domestic and overseas shipments.

Use:

Each piece of machinery shipped overseas is exposed to a wide variety of environmental conditions while in transit. Previously, Gomaco sprayed the machinery with a product which had to be removed with harsh solvents before delivery to the customer. The use of this product also exposed the wiring and electrical apparatus to potential damage, and had to be extensively and carefully removed. Because KLEEN KOTE will withstand the various environmental conditions, and will not harm any part of the machinery, Gomaco sprayed the entire piece of machinery including wiring, electrical apparatus and controls with KLEEN KOTE at a dilution ratio of 8:1 prior to shipping.

Results:

- **Durable protection of equipment during shipment** – Withstood the environmental conditions from manufacturer to the final destination.
- **Reduced labor for cleaning at destination** – There was not any oily residue left on the machinery & no harm was done to wiring, electrical or controls. As an added benefit the preparation time before final delivery was greatly reduced.
- **Enhanced product image** – KLEEN KOTE prevented corrosion and protected the overall appearance of the machinery prior to delivery to the end user.
- **Environmentally & user friendly** – Gomaco's employees and customers did not need special equipment or protective clothing to handle, apply or remove KLEEN KOTE.
- **Economical** – KLEEN KOTE reduced costs and environmental impact due to the decrease in labor and materials needed for application and clean up.

Progressive Solutions' customers, such as Gomaco, have been able to rely on our prompt service and high quality products for more than a decade and continue to strive for excellence today. With 13 years of partnered success, Gomaco and KLEEN KOTE have a solid bond to protect and preserve all Gomaco's machinery for many years to come. Gomaco Corporation

Internationally Shipped, Fully Protected.

Gomaco Corporation sprays their machinery entirely with KLEEN KOTE prior to shipping, protecting the machinery from potential threats of the environment. KLEEN KOTE reduced their costs by reducing labor and materials needed to prepare the machine before shipment and reduced the final prep time upon arrival at its final destination.

Gomaco and KLEEN KOTE are an International Pair.

Gomaco Corporation has distribution throughout the world as does Progressive Solutions Corporation. Together, these companies provide their customers with the ultimate product throughout the globe.
