Miller Formless Co.

Location: McHenry, IL USA

Industry: Anti-Corrosion

Product: KLEEN KOTE

Background:

With nearly 40 years of experience, Miller Formless Co. has manufactured and sold equipment for bridge, road, curb, barrier, and sidewalk development. Their vast knowledge of the "formless" placement of concrete for infrastructure has allowed them to develop machines such as: pavers and slipforms for: barrier, curb, bridge, paving and sidewalk placement on a national and international level. Miller Formless Co. was looking for a way to protect their machinery while in transit to its final customer destination both nationally and internationally.

Use:

Miller Formless Co. ships their equipment globally, subjecting the equipment to multiple changes in environmental conditions. These changes result in an increased potential for corrosion. To this day Miller Formless Co. provides their customers a gallon of KLEEN KOTE with each machine sold and has realized that the same protection their customers have while using the machine could benefit the same machine while in transit. Miller Formless Co. sprays each of their machines with KLEEN KOTE—controls, electrical apparatus, wiring and all—at a dilution ratio of 8:1 prior to being shipped to the customer.

Results:

- **Durable protection of equipment during shipment** – Withstood the environmental conditions whether they shipped within the U.S. or Internationally.
- **Reduced labor for cleaning at destination** – There was not any oily residue left on the machinery and no harm was done to the wiring, electrical or controls. As an added benefit the preparation time before final delivery was greatly reduced.
- **Enhanced product image** – KLEEN KOTE prevented corrosion and protected the overall appearance of the machinery prior to delivery to the end user.
- **Environmentally & User Friendly** – Miller Formless' employees and customers did not need special equipment or clothing to handle, apply or remove KLEEN KOTE.
- **Economical** – KLEEN KOTE reduced costs and environmental impact due to the decrease in labor and materials needed for application and clean up.

Miller Formless Co. has provided KLEEN KOTE with their machines for over 12 years and continues to protect their machinery during transit to create even more added benefits for their customers. For more information on how to purchase Miller Formless Co.'s finest construction equipment globally, you can visit them at: www.millerformless.com for more uses of KLEEN KOTE visit us on the internet: www.4progressive.com.
